

W1 INTELLIGENT TOILETS

Lorem ipsum dolor sit amet,
consectetur adipiscing elit, sed.

BENEFITS & TECHNOLOGIES

EASY TO USE
MULTIFUNCTIONAL KNOB

W1 AIR PRESSURE
ASSISTED SYSTEM

AUTO OPEN

REMOTE CONTROLLER

ULTRAVIOLET
STERILIZATION

MULTIPLE WASHING MODES

EASY CLEAN CERAMIC

DEODORIZATION

ANTI-BACTERIAL
HEATING SEAT

W1 AIR PRESSURE-ASSISTED SYSTEM

W1 is equipped with W1 air pressure assisted system, a series of excellent features such as greater stability, strength, and water efficiency, brings a much better solution for tankless flushing system and have laid a solid foundation for the popularity of tankless toilets

QUIT EFFECT

The flushing noise of W1 tank less toilet has reached a mute effect of only 36.8 decibels for L50 and 59.2 decibels for L 10. This is far lower than similar competitive products and national standards, bringing a higher quality of life

Exclusive patent
Invention patent

Adaptable
Adaptable water pressure:
1.0-8.75 kgf/cm²

Super water saving
Flushing volume 3.8L

Resistance To Dirty Water
More than 100000 times of water
resistance tests

Powerful flush
PowerFlush can effectively
flush all waste away at one
time by accumulating and
compressing air

**Hydrodynamic
flushing system**
Air pressure - assisted flushing
system

Flush without electricity
Mechanical flushing system
boosts the flushing power
without electricity

Reliable
1 Million times life testing,
1500PSI margin pressure testing

National standard : GB6952-2015
L50 ≤ 55 DB
L10 ≤ 65 DB

SERIES OF W1 TOILET ELECTRIC AND NON-ELECTRIC

At present, in most bathrooms, there is no reserved power socket beside the ceramic toilet. When people want to improve the quality of life and upgrade to a tankless toilet, they often are stuck in the dilemma of no electricity for flushing. W1 tankless toilet solves this problem. By using the energy of air, it can realize the flushing of the tankless toilet without using electricity.
